Education

LA CONSOLACION UNIVERSITY PHILIPPINES   City of Malolos, Bulacan
Bachelor of Science in Information Technology
Dabreeder: A Dog Breeding and Trait Matching Platform (Capstone)
Relevant Coursework: Web System and Technologies

Technical Projects

DaBreeder   September 2025 – December 2025
Full-Stack Web Development
dabreeder.vercel.app

- Developed a dog-breeding and trait-matching platform using React and Supabase, providing a centralized space for dog owners and breeders.
- Implemented user authentication and role-based access control using Supabase Auth.
- Built a community forum module enabling topic creation, discussion threads, and user engagement.
- Programmed a real-time chat system supporting direct messaging between dog owners and breeders.
- Created a custom trait-matching algorithm with veterinarian-assisted validation to ensure ethical and data-driven breeding recommendations.

Personal Portfolio   September 2025
portfolio-rochristian-87.vercel.app

- Developed a personal portfolio using React and Vite, optimized for fast load times and responsive design.
- Implemented custom UI styling using CSS to ensure a clean, consistent layout and improved user experience.
- Deployed the website on Vercel for reliable hosting and continuous integration.

Blog Website   April 2025

- Developed a dynamic blog website using HTML, CSS, and JavaScript for the front end, with PHP and SQL for the back end to support content creation and data management.
- Implemented full CRUD (Create, Read, Update, Delete) functionality for blog posts, categories, and user-generated content.
- Designed a responsive and user-friendly interface to enhance accessibility, usability, and overall user experience.

Certification

Microsoft Office Specialist: Access Expert (Database Management)   January 2025
Microsoft

- Certified Microsoft Office Specialist (MOS) in Microsoft Access, demonstrating proficiency in database creation, queries, forms, and reports.

Skills & Interests

Technical: HTML, CSS, JavaScript, TypeScript, PHP, Java
Frameworks: React.js
Database and Backend: PostgreSQL, MySQL
Tools: Cursor, Git, GitHub, GitHub Copilot, Vercel, VS Code, Google Gemini and Supabase
Interests: Web Development Technologies, AI-Assisted Development Tools, and Automated Workflow Solutions
